Fish Species Distribution in Saskatchewan

Technical Report 91-7

92-04079/

INTRODUCTION

This report is a compilation of records of occurrences of fish species in Saskatchewan by waterbody. It includes the verified records reported by F.M. Atton and J.J. Merkowsky in the "Atlas of Saskatchewan Fish"; extensive records generated in the sport fish management surveys conducted by D.E. Snell; and the sportfish management reports for 1986, 1987, 1988 and 1989.

The data base consists of two dBase files: 1) a detailed file citing individual observations, and (2) a summary compilation of species occurrences by waterbody.
